SpareBank 1 SR (1839)
Stavanger
Moody's: Aa3

SpareBank 1 Sørøst (1844)
Sandefjord
Moody's: Aa3

SPAREBANK 1 ALLIANCE BANKS

Banks in Norway

Savings banks (*Sparebank*)
88 Banks, 3 alliances/groups
and independent banks

Commercial banks: larger Nordic banking
Groups but also smaller banks

- Banks compete for the same customer base, but with larger commercial banks focusing on larger corporations
- A savings bank's strength sits in its local or regional market and in the household and SME sector

Banking sector relative size, (2023)

Largest banks by lending volume (2023)

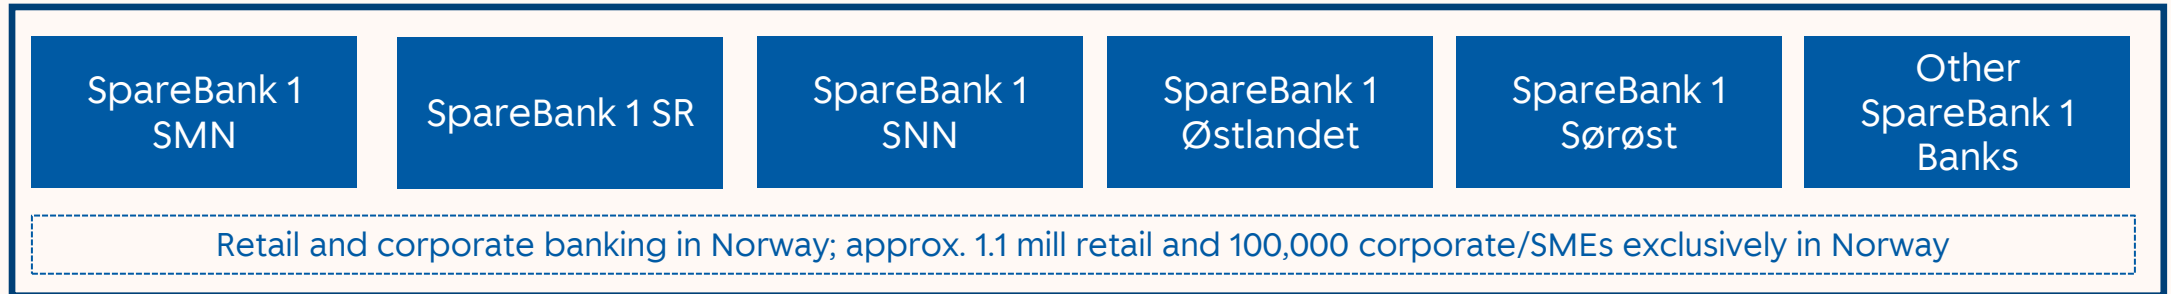

Norwegian savings banks - characteristics

- Norway's first type of bank, founded in the 1820ies, retains local and regional character today
- Sparebanks are universal banks, but only domestic lending, focus on residential mortgage lending
- Savings banks are self-owned institutions, as well as investor owned
- All larger savings banks' equity (capital certificates) are listed on the Oslo stock exchange
- Share of profits provided as gift annually (society dividend) based on the bank's self-owned share of capital

10 largest Sparebanks, NOK bn total assets

SpareBank 1 Alliance overview

- SpareBank 1 Group Holding Co.**
- **Product companies**
(Products are marketed/distributed through the banks):
Insurance, Investments funds, factoring, payments, other

- SpareBank 1 IT & Operations****
- **Business operations** and improvements, drives “economies of scale” for the banks**

- Direct operating subsidiaries**
- **SpareBank 1 Boligkreditt***
 - SpareBank 1 Naeringskreditt (Covered Bonds – commercial pool)
 - BN Bank, SpareBank 1 Markets, SpareBank 1 Real Estate (Norway’s largest real estate broker)

Balance Sheet and Market Share

Aggregated SpareBank 1 lending

Source: SpareBank 1 Banks financial reporting

Development market shares residential mortgages

Source: Eiendomsverdi:

- figures are based on the number of financed properties
- DNB acquired lender Sbanken in late 2022 which cause the jump in the DNBS market share
- Danske Bank is in the process of selling its residential lending portfolio to Nordea

MACROECONOMIC OVERVIEW

GDP Change

MAKROECONOMIC OVERVIEW

Outlook Indicators

- The PMI manufacturing index reflects current production, new orders, employment, delivery time and goods in storage

- Consumer confidence reflecting quarterly household financial expectations (for themselves and the country) over the next 12 months

- The Norwegian CB business survey reflects activity and expectations ahead. Labour tightness is share of companies reporting this. Other indicators are per cent change.

Energy

Norwegian oil and gas resources

Norwegian production in million Sm3 Oil equivalents

Renewable Energy Export

MACROECONOMIC OVERVIEW

GDP Components

GDP by expenditure, 2023

Per cent change in GDP components and forecast

- Oil and gas investments at 15-20% of all investments have large swings which are related to energy markets dynamics and project pipelines as well as special sector tax rules. These are expected to grow following the European energy crisis
- Gross capital formation in Norway is relatively high; important for productivity growth potential

Norwegian Exchange listed companies and employees by sector

Industries of firms listed on the Oslo exchange

Employees in Norway by main sector

MACROECONOMIC OVERVIEW

Labour Market

Productivity and wages

Labour productivity; output per hour worked, index

Unit Labour Costs (nominal), 12 months change

GDP per capita in 2021 constant USD at PPP

Real wages Norway, index 2010=100

• Productivity is the basis of real wage increases which are not inflationary

Interest rates, inflation and bank sector losses

Interest rates and inflation

Loan provisions and losses aggregated banking sector

Household sector income, savings and mortgage affordability

Aggregate Household income, consumption and savings

- Savings is the difference in disposable income and consumption, with the addition of pension savings flow not in disp. income

Mortgage affordability

- Mortgage servicing is modelled based on 85% LTV of the median valued house, 30 years full repayment, with average annual variable mortgage rates
- Share of income needed for debt service, after deducting the cost of necessities, have risen to an estimated 40% on average for 2023

Sovereign Wealth Fund

The spending rule: The gov. budget's non-oil & gas fiscal deficit may be max. 3% of the fund's size – financed by the fund

The **combined government surplus + fund cash income** is high due to recent high energy prices

Covered Bonds in the Norwegian context

Covered bonds and government debt outstanding relative shares

Bonds outstanding related to mainland GDP

Harmonization of covered bonds

EU Regulatory Framework:

Covered Bonds Directive Directive (EU) 2019/2162 & **Capital Requirements Directive**

Art. 129 defines preferential risk weights and eligible assets for Covered Bonds

BRRD

Covered Bonds are excluded from bail in

EMIR

The regulation define specific treatment of cover pool derivatives

LCR Delegated Act

Defines Covered Bonds as liquid assets Level 1 or 2

Solvency II

Delegated Act – capital requirements for insurance investments in Covered Bonds

Norwegian Covered Bonds framework:

- **All of the EU Regulatory Framework in effect**
 - The Covered Bond Directive (harmonization Directive) became effective in Norway from July 2022
 - Key points from the Norwegian harmonised Covered Bond framework:
 - **Cover Pool:** CRR Art. 129 defines eligible assets. In practice cover pools with only residential mortgages (separate public sector and commercial pools exist)
 - **Asset valuation:** maximum prudent market value, documented individual assessment by independent person or by statistical models (for residential real estate) **Max LTV:** up to 80%
 - **Rate and currency risk:** limited
 - **Derivatives:** only for hedging rate and currency risks and with counterparties rated risk class 1 or 2
 - **Liquidity buffer:** 180 days net cash outflows covered, may be calibrated on extended maturity
 - **Soft bullet:** Extended maturity of up to 12 months possible with approval from the FSA following from the prospect of an imminent liquidity crisis which would likely not be otherwise solved
 - **Overcollateralization:** 5%
 - **Registry:** detailed requirements **Cover pool monitor:** in place, checks registry quarterly with annual reporting to the FSA
 - **Investor reporting/transparency:** required, details as in HTT
- **SpaBol** issues **EU Covered Bonds (Premium)** from July 2022

Commissions are the net interest margin on residential mortgages, paid to the originating SpareBank 1 banks

No realized losses, loss provisions are IFRS 9 modelled provisions under assumptions

Stress testing the cover pool – real estate valuation declines

- In a scenario with declining real estate valuations, an increasing share of mortgages above the 75% legal limit become ineligible as cover assets
- Accordingly, mortgages need to be replaced, this is the 'required top-up' in the chart
- Parts of the mortgages in the highest LTV brackets needs replacing as house prices decline
- The SpareBank 1 mortgage reserve requirement calls for each bank to have non-zero, cover pool qualified, mortgage reserves after a 30% price decline scenario
- The qualified reserve mortgages (red bars) decline as their LTV increase and as the top-up is provided to the cover pool
- The w.a. pool LTV shown in the chart is prior to the top-up, only considering the price declines based on the current pool mortgage balance

Overview and development

| | |
|----------------------------|---|
| MORTGAGE MARKET | <ul style="list-style-type: none"> Total size approximately NOK 3,800 billion 4Q 2023 (€350 bn) Private banks are the dominant suppliers of mortgages Scheduled repayment mortgages: ca.85% Typical maturity: 25 years First priority security market, thorough documentation |
| HOME OWNERSHIP | <ul style="list-style-type: none"> Over 82% of household's owner occupied Between 50 and 60% are detached one-family houses |
| SOCIAL SAFETY | <ul style="list-style-type: none"> Unemployment benefits represents ca 60% of salary for 2 years |
| PERSONAL LIABILITY | <ul style="list-style-type: none"> Borrowers are personally liable for their debt Swift foreclosure regime upon non-payment Transparent information about borrowers (national debt registry) |
| MORTGAGE MARKET REGULATION | <ul style="list-style-type: none"> Loan to value: 85% (75% legal limit for cover pool) Flexible repayment mortgages: max 60% LTV 3% mortgage interest rate increase as stress test (prior 2023; 5%) Maximum 5x debt / gross income for borrowers Repayment minimum 2.5% p.a. when LTV > 60% Exemptions 10% / 8% for Oslo |
| INTEREST PAYMENTS | <ul style="list-style-type: none"> 95% of mortgages are variable rate Interest rates can be reset at the banks's discretion, by giving the debtor 6 weeks' notice |
| TAX | <ul style="list-style-type: none"> 22% of interest paid is tax deductible (equal to the basic rate of tax) Owner occupied residence at 25% of market value for wealth tax |

12 month credit growth rate household sector

Interest rates

Mortgages

RESIDENTIAL REAL ESTATE MARKET

Price development

Residential real estate price index (Jan. 2014=100)

Indexes of the largest cities (Jan. 2014=100)

Norwegian index change the last twelve months

Norwegian index change last years

- Regulatory rules for lending to households apply
- The market has shown strength through the Corona crisis, due to lower interest rates
- Drivers are population growth and new construction, urbanization, income growth and the jobs market and interest rates

Transactions and inventory

All Norway

City of Oslo

- The charts display the number of transactions of residential units
 - Transactions: sum over the last twelve months
 - For sale: cumulative – an unsold unit offered for sale is counted for 180 days

New builds and population change

All Norway

- Population increases are mainly driven by immigration
- New construction is low in comparison to the requirement, driving prices in central locations upwards
- The relatively low new builds influences the pricing on the market for used homes upwards

Oslo

Price development international comparison

RESIDENTIAL REAL ESTATE MARKET

Affordability

Adjusted real estate price index (Jan 2010=100)

- Average house prices for Norway, as adjusted by HH after-tax income have increased since 2010, but remained flat since 2016/2017.
- Drivers of the increase is primarily the price development in Oslo, but also new building standards

Median value house to family income (w/projected income development)

Square meter average: EUR / m2

RESIDENTIAL REAL ESTATE MARKET

Affordability

- The Family index shows which share of residential units are offered for sale that are affordable for a “standard” family
- It is based on a “normal” working household income with children and current mortgage market lending regulations
- Oslo has very few possibilities, but Commute Oslo is 30-40 min train commute from the city centre
- From 2023 the regulatory interest stress test is reduced, allowing for more purchasing possibilities

Household Sector Debt

Household debt

Household debt to disp. income

— Debt / income after tax and interest payments (left axis)

.... Interest / after-tax income (right axis)

* Disposable income is after tax and interest payments

Household assets and debt (excl. pension assets) 2022

Assets do not include any pension claims

Household Sector Debt

Share of households in different debt-to-income intervalls across all Norwegian households

- In 2022 households without debt and debt < income grew from 2021
- Also in 2022, the share of highly indebted households declined
- This data is updated annually in December for the previous year

Notes

1. Covered bonds are issued through the Alliance's banks SpareBank 1 Boligkreditt and SpareBank 1 Naeringskreditt.

The exception is SR bank, which uses its own issuer.

2. NPL means loans in Stage 3, IFRS 9, which include payment defaulted and loans at risk of default

3. The ratios in the All other SB1 banks column are weighted averages

SpareBank 1 Banks equity total return

Results of the regional savings banks (SpareBank 1 Alliance banks) performance due to:

- Continued improvements in cost efficiencies (low cost to income)
 - Fewer bank branch employees, more customer interaction via technology
 - Number of bank physical branch offices reduced
 - Saving banks are consolidating
- No expansion – or failed expansions – outside of Norway
- Well capitalized banks
 - Pursuing core business
 - Offering full palate of financial services to the customer base
 - Sufficient capacity to cover potential losses – and low actual losses
- A strong Norwegian economy with credit growth, low bank losses and increased asset (real estate) values

SpareBank 1 Boligkreditt Green Bond Rating

ISS – Oekom Green Bond Rating

Strengths and Weaknesses

- + clear and conclusive eligibility criteria
- + comprehensive external assurance of bond framework
- + reasonable structures for the management of proceeds
- + clear sustainability strategy of the issuer
- no comprehensive approach regarding specific social risks of residential mortgages

Moody's Green Bond Rating

Green Bond Assessment - January 2018 issuance

Summary analysis

ESG in the SpareBank 1 banks

Founding Signatory of:

- ESG is an important strategic focus in the banks' business, driven by dedicated teams and is inclusive in the credit modelling and lending decision process
- SpareBank 1 Banks are foundational members of the **UN Environmental Programme Principles of Responsible banking** (which implements the Paris Agreement in the financial industry) and of the **UN Global Compact** (which targets the overall UN sustainability goals)
- SpareBank 1 Banks have created climate accounts (Scope 1-3) and have set goals
- SpareBank 1 banks are offering green mortgages to customers, are issuing green senior bonds and are working with SpaBol regarding green covered bonds

Green covered bonds: selection of Norwegian mortgages

| | Top 15% energy efficient | EU Taxonomy | Portfolio (NOK) |
|---|--------------------------|-------------|-----------------|
| 1. Most recent building codes (> TEK 10, correlates with EPC A and B) | ✓ | ✓ | 35 Mrd. |
| 2. EPC A and B from prior years (<TEK 10) | ✓ | ✓ | 5.6 Mrd. |
| 3. Refurbished buildings (30% energy efficiency improvement) | ✗ | ✓ | -- |
| 4. NZEB new building code from 2022 | ✓ | ✗ | -- |
| 5. 10% better energy efficiency than the NZEB building code (delivered energy*) | ✓ | ✓ | -- |
| 6. Conventional (non-green) mortgages | ✗ | ✗ | 204 Mrd. |

- The Near Zero Energy Building (NZEB) concept has just been established in Norway (Feb 2023)
- SpaBol expects to implement this new selection approach (NZEB -10%) as part of an updated Green Bond Framework, which is expected to be concluded later in 2023

Notes: 1. TEK = technical building requirement

* Corresponds to the EU Taxonomie from 2020. Could be possible to achieve and calculate (with renewable energy playing a role) in the context of the new final building code

Building codes and energy use

EU Taxonomy Assessment

| EU Enviro. Objective | EUT Economic Activity: 7.7 Acquisition & Ownership of Buildings | | |
|--------------------------------|--|---|--|
| | EUT Criteria | SpaBol Green Bond | Alignment |
| 1. Mitigation | Technical Screening Criteria i. Built <2021: EPC A or Top 15% approach ii. Built ≥2021: NZEB -10% | Eligibility criteria = Top 15% approach (via Building code / EPC label) i. No relation to fossil fuels iii. All Norwegian new builds have EPC labels | Partial Alignment <ul style="list-style-type: none"> • Built <2021: 94.9% (Aligned) • Built ≥2021: 5.1% (Out of scope) ¹ |
| | Do No Significant Harm i. Building not directly related to fossil fuels industry ii. Built <2021: At least EPC C or within Top 30% iii. Built ≥2021: At least NZEB standard & EPC label in place | | |
| 2. Adaptation | Do No Significant Harm i. Reducing material physical climate risks ii. Supporting system adaptation iii. Monitoring adaptation results | i. Green buildings are aligned with Norwegian environmental legislations via the building code, where an environmental risk assessment is conducted at the planning stage and relevant measures are applied to reduce identified risks ii. Green buildings do not increase the risks of adverse climate impact on other stakeholders and align with national adaptation efforts iii. Adaptation results can be monitored and measured → TEK10 & TEK17 Building Code Regulation (= SpaBol Green Bond Criteria) ensures new buildings are not prone to significant Physical Climate Risks e.g. Flooding; Storm Surges, Landslides. | Aligned |
| 1. Mitigation 2. Adaptation | Minimum Social Safeguards i. OECD Guidelines on Multinational Enterprises ii. UN Guiding Principles on Business and Human Rights iii. ILO Core Labour Conventions | i. Not applicable. SpaBol operates only in Norway and not overseas ii. Norway applies a National Action Plan for the implementation of the UN Guiding Principles. In addition, SpaBol's due diligence processes ensures alignment and compliance iii. All 8 ILO Core Labour Conventions are enshrined in Norwegian law | Aligned |
| | | | Green Bond Portfolio Alignment: 94.9% aligned |

Building stock and green share thereof (newbuilds from 2012)

- The light blue line shows that 10% of properties in Norway were constructed from 2012
- These 10% of residences make up most of the universe for the green portfolio (built from 2012)
- Additionally A and B EPC properties constructed before 2012
- In total, the green universe is <15% of all residential properties

Building codes, energy, CO₂ emissions

Cumulative share of residential energy heating demand from building year

Cumulative share of Co₂ of the residential energy demand

- The SpaBol green Portfolio eligible building stock is 10% of dwellings (previous page)
- That 10% corresponds to 4.0% of energy use, which is the cumulative energy use of all properties constructed from TEK 10 and onwards in the top chart
- This corresponds to 4.3% of residential estimated CO₂ emissions in the bottom chart

SpaBol green mortgages portfolio

- Green volume of approx. NOK 47 bn.
- Overall portfolio 263 bn, Green Ratio 17.4%
- EUR 2.75 bn and SEK 8.5 bn green covered bonds have been issued

- Building years 2009-2011 and EPC C were categorized as green until June 2021 («grandfathered volume»)
- Building years 2021 and 2022 are also according to top 15%, NZEB-10% not yet available/implemented

Green bond impact

Green bond impact – national electricity production mix

New green mortgages offered

Increase energy efficiency in existing buildings

Refurbishment of older buildings

Construction of new energy efficient buildings (EPC A and B)

| | Green Mortgage Terms | Interest savings |
|-------------------|---|---|
| SpareBank 1 banks | <ul style="list-style-type: none"> Mortgages financing A and B EPC labels residential properties always qualify as a green mortgages Project criteria overlaps with ENOVA (gov energy efficiency agency) criteria for increasing energy efficiency measures | Generally / average 40 bps savings on a green vs. conventional mortgage (may range from 25 to 50 bps in individual SpareBank 1 banks) |
